PRESENT THIS VOUCHER AT YOUR  
NEAREST AUTOSPARK LOCATION FOR  
THIS HANDY DISCOUNT AND HAPPY  
MOTORING!

## IN CASE OF AN EMERGENCY AND YOUR CAR WON'T START?

### HERE ARE SOME THINGS YOU SHOULD KNOW

- The average life of a Car Battery is approximately Three Years (under normal operating conditions).
- Jump Starting can cause very expensive damage if not done properly. Damage to a vehicle's electrical system, particularly to on-board electronic computers, can be quite expensive! (Check the Operating Manual).
- It is important to fit the correct battery for your vehicle. A battery's reserve capacity must sustain a minimum electrical load for Ignition, Headlights and Wipers under cold Winter conditions.

WE HAVE PERFORMED A STANDARD DIAGNOSIS  
OF YOUR BATTERY WITH THE OUTCOME  
OF ITS CONDITION
